## &gt; PARALLEL CLAMP

AT-011F

AT-016F

AT-013F  
AT-009F

Parallel bond for cable or round conductor. AT-013F is used for bonds between copper and aluminium conductors, preventing galvanic coupling.

| Reference | Dimensions (mm) | Conductor range |                 |                   | Material        | Weight (g) |
|-----------|-----------------|-----------------|-----------------|-------------------|-----------------|------------|
|           |                 | Ø (mm)          | mm <sup>2</sup> | Tape (mm)         |                 |            |
| AT-011F   | 52 x 45 x 20    | 8               | 50              | 30 x 2 - 30 x 3.5 | Naval brass     | 131        |
| AT-013F   | 50 x 38 x 47    | 6 - 15          | 25 - 150        | -                 | Aluminium alloy | 136        |
| AT-016F   | 42 x 41 x 51    | 4 - 14          | 16 - 120        | -                 | Naval brass     | 220        |
| AT-009F   | 31 x 38 x 36    | 6 - 10          | 25 - 70         | -                 | Aluminium       | 63         |

Complies with UNE 21186, NF C 17-102, IEC 62305, IEC 62561
